

ARE YOUR CYBERSECURITY EFFORTS VERIFIED?

Cybersecurity actions only matter when they're verified – not just assumed.

Participation

Sent phishing reminder

Completed annual training

Enabled MFA across users

Installed endpoint tools

Distributed policy for signature

Filed insurance questionnaire

Activated backup system

Protection

Tracked click rates
and retrained failures

Tracked repeat failures
and enforced action

Audited exemptions and
removed old accounts

Verified reporting and alert activity

Monitored actual usage
and access behavior

Collected evidence to
support each answer

Performed and
documented a restore test

Ready to move from assumptions to evidence?
Let's verify your cybersecurity program together.
