

# AI NETWORK READINESS SCORECARD

Rate each area to assess  
your network's readiness for  
AI and IoT workloads.

## Latency Thresholds

Can your circuits support real-time AI traffic?

YES  NO

## Edge Hardware Capacity

Is your edge hardware sized for AI and IoT processing?

YES  NO

## Real-Time Traffic Visibility

Do you have live visibility into application-level flows?

YES  NO

## IoT Segmentation

Are IoT devices segmented from core business traffic?

YES  NO

## Cloud Routing Optimization

Are cloud workloads taking the most efficient paths?

YES  NO

## Carrier Redundancy

Do you have multiple carrier paths for failover?

YES  NO
